Hopscotch Game Instructions

1) Draw the hopscotch grid on the sidewalk.
2) Standing behind the no. 1 square, a player tosses a bean bag onto square 1.
3) The player follows the grid, hopping 1 foot on single squares (1,4,7,10), and 2 feet on double squares.
4) The player must hop over the square with the bean bag.
5) On square 10 the player must turn around (on 1 foot), and return through the grid.
6) If successful (does not step on lines or miss squares), the player gets another turn. The player tosses the beanbag onto the next number.
7) This player’s turn ends if the bean bag is tossed on an incorrect square, steps on a line, or misses a square.
8) The goal of the game is to progress through all numbers before the opponent.
